Lecture 26 — Predict a system through time

Fri Oct 23

Last updated: August 18, 2026.

The class outline for this day will be posted before class.

Reading: Lab 3, Lachniet Ch. 2, and introductory programming/loops. Related objectives: Lectures.

Learning objectives

By the end of class, students should be able to:

1. Implement a linear dynamical model.
2. Write or complete a short iterative calculation.
3. Validate the first steps by hand.
4. Compare results under altered parameters or initial states.
5. Record an unexplained long-run pattern for later investigation.
