

Quiz 1

Friday, September 4 — vectors, linear combinations, and Lab 0

Last updated: August 18, 2026.

Related lectures: [Vectors](#), [Arithmetic](#), [Combinations](#).

Related lab: [Lab 0](#).

[Schedule](#)

Core

- B 1.1, 1.2, 1.6, 1.7, 1.9, 1.13, 1.18
- L Ch. 1 Ex. 2(a), linear-combination portion
- C0.1: Enter and index a vector of measurements (Octave or Python).
- C0.2: Modify two entries and explain what changed in context.
- C0.3: Plot x , $2x$, and $-x$, and describe the geometric changes.

Stretch

B 1.5, 1.11, 1.20.

What a quiz item might change

The entries or units, a different linear combination, or four lines of Octave/Python whose resulting vector you predict.
