Core

- B 4.2, 4.3, 4.4
- B 5.1, 5.2, 5.3, 5.4, 5.5
- C4.1: Determine whether a given vector belongs to a simple span.
- C4.2: Select a basis from a redundant collection and state its dimension.
- C4.3: Explain dependence as redundancy in a sensor or feature example.
- Lab 1 reflection: Explain whether a cluster result changes under feature rescaling.

Stretch

B 4.1, 5.6, 5.8.

What a quiz item might change

New cluster centers, one vector in a candidate basis, or whether three displayed vectors can form a basis for $\mathbb{R}^2$.
