Midterm 2

Friday, November 13 — in class (exam not posted)

Last updated: November 5, 2026.

In class for the entire period on Friday, November 13. See the schedule and the day page Lecture 27. **The exam itself is not posted online.**

Covers Lectures 18–25 (Unit II through determinants; skip Veterans Day / review day) and skills from Quizzes 5–9. Hand definitions, concepts, and computation — no software / code syntax.

Prepare

1. Study guide — learning outcomes, how to build a definitions/formulas list, rework lecture and quiz examples.
2. Practice packet — definitions, easy computations, harder problems (answers at the end).

Monday, November 9 is a prep day: Lecture 26.

Learning objectives

By the end of the exam, students should be able to:

1. Analyze matrices as transformations and models.
2. Solve and interpret systems.
3. Use matrix products, powers, rank, inverses, and determinants appropriately.
4. Interpret matrix and system results in context.
