

Lab 4 — Predict a System Through Time

Friday, October 23

Last updated: August 20, 2026.

Date is on the [schedule](#). Full exercises (Octave and Python) will be posted before class.

Credit: Lab points are for effort in class, not for a Canvas file upload. Work the hub exercises in Octave or Python; handwrite answers on the one-pager hard copy and get instructor initials after a short check-in. See [Lab 0](#) for the pattern.

Resources: Lachniet Ch. 2 and programming/loops material — [Resources](#).
