Quiz 3

Friday, September 18 — norm, distance, RMS, and variation

Last updated: September 13, 2026.

Textbook: Boyd & Vandenberghe, *VMLS* (PDF)

Related lecture: Norms (norm, distance, RMS, standard deviation; Octave/Python).

Textbooks: Boyd & Vandenberghe (VMLS) · Lachniet Octave PDF · also on Resources.

Schedule

Core

- B 3.1, 3.2, 3.10, 3.11, 3.15
- L Ch. 1 Ex. 2(c–d), norm and unit-vector portions
- C1.1: Compute distances from one observation to five candidates.
- C1.2: Compare the nearest result before and after rescaling one feature.

Stretch

B 3.7, 3.9, 3.13, 3.28.

What a quiz item might change

Three short vectors, the units on one feature, or a Boolean pair whose disagreement count you convert to a distance.
