Final exam

Wednesday, December 16, 10:20 a.m.–12:10 p.m., FR 201

Last updated: October 8, 2026.

Wednesday, December 16, 2026, 10:20 a.m.–12:10 p.m. in FR 201. See the schedule. Cumulative over the course (Units I–III), with emphasis on choosing tools and interpreting results as well as hand fluency.

Prepare

1. Study guide — cumulative outcomes, links to midterm guides, how to build a definitions/formulas list.
2. Practice packet — Unit I refresh, Unit II refresh, material since Midterm 2, mixed cumulative (answers at the end).
3. Optional rework: Midterm 1 practice, Midterm 2 practice.

Friday, December 11 is a cumulative review day (Lecture 43) — **no new quiz**.

Learning objectives

By the end of the exam, students should be able to:

1. Demonstrate small-scale hand fluency.
2. Select tools in unfamiliar contexts.
3. Interpret software-generated results.
4. Explain connections among major concepts.
5. Apply linear algebra to quantitative problems.
