

Lecture 09 — Nearest neighbors

Mon Sep 14

Last updated: August 18, 2026.

The class outline for this day will be posted before class.

Related reading and the course-wide list of daily objectives: [Lectures](#).

Learning objectives

By the end of class, students should be able to:

1. Formulate a nearest-neighbor question using vectors.
2. Find a nearest neighbor in a small dataset by hand.
3. Explain how feature scale can affect the answer.
4. Justify a choice of distance or similarity measure.
