

Lecture 14 — Basis, dimension, and orthonormal vectors

Fri Sep 25

Last updated: August 18, 2026.

The class outline for this day will be posted before class.

Related reading and the course-wide list of daily objectives: [Lectures](#).

Learning objectives

By the end of class, students should be able to:

1. Explain what a basis accomplishes.
2. Identify a basis and dimension in simple examples.
3. Use linear combination, span, subspace, independence, basis, and dimension accurately.
4. Recognize an orthonormal collection.
5. Explain why orthonormal coordinates are convenient for measurement and reconstruction.
