

Lecture 24 — Linear dynamical systems

Mon Oct 19

Last updated: August 18, 2026.

The class outline for this day will be posted before class.

Related reading and the course-wide list of daily objectives: [Lectures](#).

Learning objectives

By the end of class, students should be able to:

1. Represent an evolving system as $x_{t+1} = Ax_t$.
2. Interpret the state vector and transition matrix.
3. Build a transition matrix from a flow description.
4. Compute and interpret the next few states.
