Lecture 16 — Midterm 1

Fri Oct 2

Last updated: October 8, 2026.

Textbook: Boyd & Vandenberghe, *VMLS* (PDF)

Midterm 1 — in class for the entire period. The exam itself is **not** posted online. Related objectives: Lectures. Schedule.

No new lecture content today. Bring something to write with.

Coverage

Lectures 01–14 and fluency from Quizzes 1–4, including Labs 0–2 ideas.

Prep (from Wednesday): study guide, practice packet.

Learning objectives

By the end of the exam, students should be able to:

1. Compute with vectors and linear functions.
2. Interpret vector operations in context.
3. Analyze distance, similarity, span, and independence.
4. Select and communicate an appropriate method.
