

Quiz 8

Friday, November 6 — matrix multiplication, computational order, and inverses

[Download PDF](#)

Last updated: August 18, 2026.

Related lectures: [Products](#), [Powers](#), [Cost](#), [Inverses](#).

Related lab: [Micro-lab: computational cost](#).

[Schedule](#)

Core

- B 10.3, 10.5, 10.6, 10.7, 10.9, 10.10, 10.13, 10.14, 10.15, 10.22
- B 11.1, 11.2
- C8.1: Compare $(ab^T)c$ with $a(b^Tc)$.
- C8.2: Count intermediate stored values for both evaluation orders.

Stretch

B 10.18, 10.23, 11.10, 11.25.

What a quiz item might change

The order of two transformations, matrix dimensions, whether an inverse exists conceptually, or timing output from two equivalent computations.
